## DETAILED ACTION

### *Double Patenting*

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 14-24 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of Claims 11-21 of copending Application No. 09/832,715. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Both applications are directed, verbatim, to a system for producing power that comprises a fuel cell assembly, a filter assembly comprising a housing and a filter element designed to remove particulate contaminants and a sound suppression element arranged to provide broadband sound attenuation by at least 6dB at one meter.

Art Unit: 1746

*Allowable Subject Matter*

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to teach or fairly suggest a system for producing power that comprises a fuel cell assembly, a filter assembly comprising a housing configured to receive dirty atmospheric air and a filter element designed to remove particulate contaminants and a sound suppression element arranged to provide broadband sound attenuation of the sound passing therethrough by at least 6dB at one meter.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Donald Scaltrito, whose telephone number is 703.305.4926. The examiner can be reached in his office on Monday-Friday between the hours of 9am to 6pm.
